

COUNCIL ORDERS CONDEMNATION YOUNG PROPERTY

LOS ANGELES FEARS CIVIL WARFARE NEXT

Serious Flare-up Feud Over Water Rights is Anticipated

By Associated Press Leased Wire

Independence, Inyo county, Calif., Nov. 19.—Friction between the two types of passive resistance today threatened, according to Inyo county authorities, to snap the tension of the situation created south of here last Sunday in the seizure of the Los Angeles aqueduct by Owens Valley ranchers, and to plunge this part of California into a civil war.

Since the ranchers took over the Alabama gates of the aqueduct and diverted Los Angeles' chief source of water supply into Owens Lake, they have remained at the spillway quietly, unarmed and waiting for armed force to be sent against them. But the city has refused to attempt forcible ejection of the raiders and has contented itself with peaceful court action to recover its property. The ranchers are faced with the alternatives of either abandoning their attempt to force the city into a settlement of their long standing water-rights feud with it, or else continuing "on the job" at the spillway indefinitely.

According to their spokesman, the ranchers are not in any mood to give up their fight, nor are they in any mood to remain on the aqueduct for three months. They demand immediate settlement of their dispute with the city and each day that this settlement is delayed increases the tenseness of the situation and the likelihood of a more serious flareup of the feud.

Hold Two for Probe

Elected Officers at Meet

in Gangster's Death

By Associated Press Leased Wire

Chicago, Nov. 19.—Delegates to the annual convention of the National Petroleum Marketeers Association at this morning's session heard reports of officers and from the audit, credentials and nominating committee and a talk, "This Association," an intimate and frank man to main discussion—by President Nicholas of Chicago. Election of officers was also on the morning program.

Among speakers to address the afternoon meeting is J. L. Murray of Bloomington, Illinois, who will talk on "Why I am Opposed to Motor Dopes."

Start Action Against

Publishers Tax Lists

By Associated Press Leased Wire

Washington, Nov. 19.—The right of newspapers to publish income tax returns made public under the revenue act of 1924 is to be determined through court action in a number of cases covering various aspects of the question. Although the names of newspapers involved and other information has been withheld at the department of justice, indications are that in at least one of the cases an indictment is expected this week or early next week.

**Mrs. Harding Weak and
Exhausted This Morning**

BULLETIN

By Associated Press Leased Wire

Marion, O., Nov. 19.—Mrs. W. G. Harding, who has been critically ill for two weeks, has become worse and is showing signs of sinking into a coma according to a bulletin issued by her physician at 2:30 p. m. today.

The 2:30 report of Dr. Sawyer, said: "Mrs. Harding is worse. She is more stupid and dull. We have well marked signs of coma coming on."

Attempt to Assassinate

Egyptian Army Sirdar

Cairo, Nov. 19.—The Associated Press—Two bombs, one of which exploded, were thrown at Major General Sir Lee Stack, sirdar of the Egyptian army, while driving from the ministry of war today. The sirdar escaped injury.

Firemen Enjoy Cigars.

Members of the fire department are enjoying a box of cigars, the gift of Mrs. Freeman Hill and William Worley, in appreciation of the efficient work done early Monday morning at the Hill home.

THOMAS INCE, FILM PRODUCER, DIES SUDDENLY

Well Known Movie Director Died Today at Hollywood.

By Associated Press Leased Wire

Hollywood, Calif., Nov. 19.—Thomas H. Ince, nationally known picture producer, died at 5:30 this morning at his home in the Hollywood foothills, of heart trouble, it was announced at his Culver City studio.

Death was due to angina pectoris. He became ill on a trip to San Diego was taken from a train at Del Mar Monday night and brought to his home here last night. The attack was sudden, he having been active in the midst of his motion picture work up to the time he was stricken.

Ince was one of the pioneers and leaders in the motion picture industry, having started by taking small parts in 1911 after a stage career and soon afterward was appointed director and then became producer, building some of the best known studios of recent years. He was 42 years of age.

Ince, at the time of his death, was supervising director of the Ince Studio at Culver City, engaged in the production of big feature pictures. He is survived by a widow and three sons.

Entries for Grain Expo.

Break Existing Records

By Associated Press Leased Wire

Chicago, Nov. 19.—Entries for the International Hay and Grain Show to be held in connection with the International Livestock Show, will already have exceeded the five thousand and mark set in the record show of 1923.

Indiana, Illinois, Ohio, Iowa, Wisconsin and Minnesota, are all represented by exceptionally large corn exhibits and the hard spring wheat class is also apparently larger than ever before with an unusually good showing from the Canadian provinces according to an announcement today.

Changed His Opinion.

Yesterday you asked me if I had any personal opinion as to how my wife met her death and I told you I did not, I began. "I have sent for you to tell you that I now have a conviction of what happened. This is my own deliberate conviction and after considering all angles in the case. "I believe that my wife killed herself."

Throughout hours of questioning Rev. Sheatsley has maintained rigid composure. Reluctant to accept a verdict of suicide he could offer no evidence for murder.

"Is there anything you can tell us of any event in Mrs. Sheatsley's past life that would lead her to contemplate suicide or which would offer any motive for murder?" Prosecutor King asked him.

"I know of absolutely nothing," the minister replied.

"She was always of a quiet disposition, interested in her home work and my church and occupied with her children."

MYSTERY IN DEATH OF MINISTER'S WIFE REMAINS UNSOLVED

Questioning of Columbus Preacher Failed to Shake His Story.

BULLETIN.

By Associated Press Leased Wire

Columbus, O., Nov. 19.—Rev. C. V. Sheatsley, pastor of Christ Lutheran church of Bexley, a suburb whose wife's cremated body was taken from a heating furnace in the family home Monday, today changed his testimony of yesterday and told Prosecutor King that he believed his wife had taken her own life. Yesterday he had refused to accept a suicide verdict.

The minister's statement was made voluntarily. He called Prosecutor King on the telephone just a few hours before the funeral was to be held and said he desired a "personal" conference. The prosecutor, with a stenographer, went to the minister's study where he declared he wished to change his opinion.

"Yesterday you asked me if I had any personal opinion as to how my wife met her death and I told you I did not," he began. "I have sent for you to tell you that I now have a conviction of what happened. This is my own deliberate conviction and after considering all angles in the case. "I believe that my wife killed herself."

Throughout hours of questioning Rev. Sheatsley has maintained rigid composure. Reluctant to accept a verdict of suicide he could offer no evidence for murder.

"Is there anything you can tell us of any event in Mrs. Sheatsley's past life that would lead her to contemplate suicide or which would offer any motive for murder?" Prosecutor King asked him.

"I know of absolutely nothing," the minister replied.

"She was always of a quiet disposition, interested in her home work and my church and occupied with her children."

Today's Market Report

Wheat Market Suffers Setback During Trade

By Associated Press Leased Wire
Chicago, Nov. 19.—All grain underwent something of a setback today at the opening and then continued to show weakness. The principal bearish influence was a downturn in quotations at Liverpool where large stocks of wheat were on hand were reported and pressure to sell on account of liberal prospective arrivals. Behnkes, Rotterdam advises indicated a letup in continental demand. Opening prices here which ranged from \$1.16@1.18¢, later Dec. 1.52@1.53¢ and May 1.53@1.60¢, were followed by a moderate further setback.

Later a decided bulge in corn prices brought about rallies in the wheat market, but only of a transient character. Wheat closed weak 1/2 to 1 cent lower, Dec. 1.51@1.52¢ and May 1.53@1.54¢.

Corn receded with wheat. Many of yesterday's buyers became sellers. After opening unchanged to 1/2¢ off May 1.21@1.22¢, the market underwent a general sag to about 1¢ under yesterday's finish.

Oil's started at 1/4¢ lower to 1/4¢ advance. May 53@54¢. Later all the months showed a decline.

Prices were steady. Subsequent the corn market became bare of offerings and a general buying movement set in with prices making a rapid gain, part only, of what was held.

THE AMERICAN LEGION

Among the scores of organizations which have arisen all over this land, the one most distinctive in purpose and character is The American Legion. It is a direct outgrowth of the World War, but its future lies in the realms of peace. As the Grand Army of the Republic dated back directly to the associations of the Civil War, so The American Legion had its beginning in a desire to perpetuate and enlarge the comradeships formed by Americans, both men and women, in the sacrifices of the later and greater struggle. The general purposes of the Legion are most clearly stated in the preamble to its constitution, which reads:

"For God and Country, we associate ourselves together for the following purposes:

"To uphold and defend the Constitution of the United States of America; to maintain law and order; to foster and perpetuate a one hundred per cent Americanism; to preserve the memories and incidents of our association in the Great War; to inculcate a sense of individual obligation to the community, State and Nation; to combat the autocracy of both the classes and the masses; to make right the master of might; to promote peace and good will on earth; to safeguard and transmit to posterity the principles of justice, freedom and democracy; to consecrate and sanctify our comradeship by our devotion to mutual helpfulness."

Starting with its first meeting on American soil in St. Louis in the spring of 1919, The American Legion has spread over the land wherever men and woman were to be found who had borne some part in the Titanic struggle of 1917-18, and that included every city, hamlet and rural community in the land. Without a worthy purpose and a worthwhile method, it could not have so successfully appealed to the patriotic young manhood of the nation.

Not only in keeping alive the spirit of comradeship, but in the objectives which The American Legion has set for itself in the future, is the organization one of the greatest of modern times. Through its national and state conventions, it provides forums of discussions by the stalwart young men and women of the nation of all those great questions dealing with public welfare. It gives its members a standing in their several communities which commands respect and honor. It furnishes an agency through which in state and nation such legislation may be promoted as shall rebound to the good of the whole people. It has done and is doing a vast work in co-operation with government agencies, toward the rehabilitation of disabled or needy comrades of the World War, and their dependents. For the 500,000 children of World War veterans who will probably become orphans within ten years, the Legion is planning a broad program for proper care and education, thus by this one thing along promoting the interests of good citizenship.

By its work in Americanization of the foreign elements of our population, the Legion is combating influences of foreign origin which would undermine our thorough-going American ideals.

With a National Legislative Committee with headquarters at Washington, The American Legion is ever in touch with federal legislation so far as it relates to subjects effecting this one great body of our citizenship and those who are related to them or dependent upon them.

This one organization will within a few years be the chief if not the sole body whose care it shall be to maintain the annual custom

of decorating the graves of soldiers and sailors of all wars, and also will have established an endowment for perpetual care of the graves of dead comrades in France.

Along with these more serious purposes, The American Legion through its 11,000 posts in every state in the union, maintains recreational centers, often has club houses or rooms, such as those of the Dixon Legion Post, and provides that social contact and friendly association among its own members and the women of the hundreds of Auxiliaries which keeps alive the spirit from which the Legion was born.

Thus in practical idealism and patriotic devotion, The American Legion stands foremost among organizations in America for the strengthening of the national character and the enlargement of the blessings which our citizenship confers.

OIL.

Stored in big tanks in our country are 500 million barrels of crude oil. That's as much as we use in 10 months.

When an oil shortage develops later, as it does periodically, a big reserve will lie waiting in the tanks.

Industry not only looks ahead months, it looks ahead generations. A lot of the big planning of the present is for years hence when the planners will be gone. The system increasingly becomes more intricate. Day of hand-to-mouth business, is gone.

OURS.

Seven-tenths of the world's oil is used right here in the United States. This is an accurate reflection of our mechanical leadership, for the main uses of oil are machinery lubrication and driving power by explosion of gasoline or burning of crude oil.

Our civilization is largely mechanical. But don't be discouraged. Machinery will solve the problem of making a good living in a few hours a day. With that problem solved, man will be released for intellectual and spiritual pursuits. Previous great civilizations rested on human slavery instead of machinery.

FLYING.

On her seventy-sixth birthday, Mrs. John Lee of Kansas takes a ride in an airplane as guest of her grandson.

The picture shows her seated in the plane as calmly as though about to distribute candies among the children. You admire her courage. But by the time you are 75 you'll do most of your traveling planes. Flying already is 100 times safer than most of us believe.

TOM SIMS SAYS

Experts find music will not charm a snake, so next time you see one it is safer to run than sing.

The handles on aluminum frying pans won't get so hot but the pans are too light for spanking children.

They seldom have lightning in the polar regions, so that would be a dandy place to go to tell a lie.

Women's clothes are so funny, they are almost as funny as the men's.

The old-fashioned woman who drowned her troubles poisons him now.

It must be awful to be a school teacher and have so many children wish you would break your neck.

The flea hop is the latest dance step. It is quite an improvement over the St. Vitus.

When it comes to quail hunting most men are fine at shooting sparrows.

It is estimated a great many people will get real strong exercising to get warm this winter.

Among modern home inconveniences are gas heaters, around which there is no place to chew tobacco.

Most men try to forget their past instead of using it for their future.

Perhaps a third of our cuss words were discovered by men waiting for their wives to dress for church.

Men who catch on to things too quickly let go the same way.

The man at the bottom of most things is usually up a tree.

The future usually becomes the past without anything happening.

Life, at best, is a gamble. And the man who never takes a long-shot seldom shoots very far.

ADVENTURES OF THE TWINS

by Clive Roberts Barton

NO. 3-A CROOKED RIDDLE

"That's right," smiled the Riddle Lady. "Here is an alarm clock for your prize."

"Will everybody please be quiet now," said the Riddle Lady. "It's time for another riddle."

Nancy, who had won the prize just before that, and was showing it around to Bo Peep and Contrary Mary and Margery Daw, all of whom admired it like everything, suddenly stopped talking.

And so did Nick and Jack and Tom Tucker and Peter Peter and everybody.

Really you could have heard a pin drop almost. Even the Old-School Woman's children were quiet for the first time in six months, as their mother said afterward.

The reason was very plain. Nobody wanted to miss a word of the riddle and when there is a riddle being asked it is important to get quite all of it.

The Riddle Lady began:

"Oh, that's different," said Mrs. Spratt. "I both saw and heard them."

"Pat-a-cake, pat-a-cake, Baker Man, What can it be that he bakes in a pan?"

"As round as adollar, as flat as a plate, My dears, it's the very thing Jack Horner ate."

"Each year on Thanksgiving, of pumpkin it's made, On Christmas of mincemeat of very best grade,

"This is an easy one," said the Riddle Lady. "And very short!"

"'Tis a crooked person, Who hasn't any style, But he is so obliging,

"You will find it worth your while, To have this crooked gentleman, A guest within your house,

"As big as for size he isn't, Any bigger than a mouse."

"He'll stay down in your kitchen, Among your spoons and forks, For cook says that he's wonderful,

"At excavating corks, He's not a pushing person, But as for pull—my my!

"He'll get the goodies out for you, And doesn't even try."

"I know, I know!" cried the Ten-O'Clock Scholar. "Even if I don't get to school on time, I know a thing or two. 'Tis a corkscrew!"

"That's right," smiled the Riddle

"CAPTAIN BLOOD," a Vitagraph picture with J. Warren Kerrigan in the title role, is an adaptation of this thrilling novel.

CHAPTER XXV—Continued

Within an hour, the water-casks at least replenished and stowed aboard, the Arabella and the Elizabeth went to sea upon that angry chase.

"What now, Peter?" cried the young Jeremy Pitt. "Lord, man what is there here to fret you? Surely 'tisn't the thought of Rivarol!"

"No," said Blood thickly. And for once he was communicative. It may well be that he must vent the thing that oppressed him or be driven mad by it. And Pitt, after all, was his friend and loved him, and, so, a proper man for confidences. "But if she knew! If she knew! Oh God! I had thought to have done with piracy; thought to have done with it for ever. Yet here have I been committed by this scoundrel to the worst piracy that ever I was guilty of. Think of Cartagena! Think of the hell these devils will be making of it now! And I must have that on my soul!"

Setting a course for Hispaniola, since they judged that thither must Rivarol go to rest before attempting to cross to France, the Arabella and the Elizabeth ploughed briskly northward with a moderately favourable wind for two days and nights without ever catching a glimpse of their quarry. The third dawn brought with it a haze which circumscribed their range of vision to something between two and three miles, and deepened their growing vexation and their apprehension that M. de Rivarol might escape them altogether.

They had Jamaica on their lar-

"Damme! What's to laugh at, you porpoise?" spluttered mulberry-coat.

board beam some thirty miles to westward, and, indeed, away to the northwest, faintly visible as a bank of clouds, appeared the great ridge of the Blue Mountains whose peaks were thrust into the clear upper air above the low-lying haze. The wind was westerly, and it bore to their ears a booming sound which in less experienced ears might be passed for the breaking of iron upon lee shore.

"Guns!" said Pitt, who stood watch on the quarter-deck. Blood sprang to attention.

Ten miles away, perhaps fifteen somewhere off Port Royal, I should judge," Pitt added. Then he looked at his captain. "Deed it concerns us?" he asked.

"Guns off Port Royal . . . that should argue Colonel Bishop at work. I think it may concern us. Anyway, we'll stand in to investigate."

Clothes-hauled they tacked awash, guided by the sound of combat, for an hour, perhaps. Then, a telescope to his eye, Blood raked the haze, the guns abruptly ceased. They held to their course, nevertheless, with all hands on deck, eagerly, anxiously scanning the sea ahead. And presently an object loomed into view, which soon defined itself for a great ship on fire. As the Arabella with the Elizabeth following closely raced nearer on their northwesterly tack, the outlines of the blazing vessel grew clearer.

"An English ship!" he cried. He scanned the seas for the conqueror in the battle of which this grim evidence was added to that of the sounds they had heard, and then at last, as they drew closer to the doomed vessel, they made out the shadowy outlines of three tall ships, some three or four miles away, standing in toward Port Royal. Pitt, who through the telescope was examining the receding squadron, observed things apparent only to the eye of the trained mariner, and made the incredible announcement that the largest of these three vessels was Rivarol's *Victorieuse*. They took in sail and lay to as they came up with the drifting boats, laden to capacity with survivors.

CHAPTER XXVI THE SERVICE OF KING WILLIAM

One of the boats bumped alongside the Arabella, and up the entrance ladder came first a slight, spruce little gentleman in a coat of mulberry satin laced with gold, whose wizened, yellow, rather peevish face was framed in a heavy black periwig. His modish and costly apparel had nowise suffered by the adventure through which he had passed, and he carried himself with the easy assurance of a man of rank. He was closely followed by one who in every particular, save that of age, was the physical opposite, corpulent in a brawny, vigorous way, with a full, round, weather-beaten face whose mouth was humorous and whose eyes were blue and twinkling.

As the little man stepped from the ladder into the waist, whether Captain Blood had gone to receive him, his sharp, ferret-like dark eyes swept the uncouth ranks of the assembled crew of the Arabella.

"And where the devil may I be now?" he demanded irritably. "Are you English, or what the devil are you?"

"Myself, I have the honour to be Irish, sir. My name is Blood—Captain Peter Blood, and this is my ship the Arabella, all very much at your service."

"Blood!" shrilled the little man. "O' Blood! A pirate!" He swung to the Colossus who followed him. "A damned pirate, van der Kuylen. Rend my vitals, but we're come from Scylla to Charybdis."

"So?" said the other gutturally, and again, "So?" Then the humour of it took him, and he yelped to it.

"Damme! What's to laugh at, you porpoise?" spluttered mulberry-coat.

"A fine tale this'll make at home!" Admiral van der Kuylen first loses his fleet in the night, then has his flagship fired under him by a French squadron, and ends all by being captured by a pirate. I'm glad you find it matter for laughter. Since for my sins I happen to be with you, I'm damned if I do."

"There's a misapprehension, if I may make so bold as to point it out," put in Blood quietly. "You are not captured, gentlemen; you are rescued. When you realize it, perhaps it will occur to you to acknowledge the hospitality I am offering you. It may be poor, but it is the best at my disposal."

"Damme! Do you permit yourself to be ironical?" he disapproved him. "I am Lord Willingby, King William's Governor-General of the West Indies, and this is Admiral van der Kuylen, commander of His Majesty's West Indian fleet, at present mislaid somewhere in this damned Caribbean Sea."

"King William?" quoth Blood. "And who may be King William, and of what may he be King?"

"I am alluding to His Majesty King William III—William of Orange—who, with Queen Mary, has been ruling England for two months and more."

"Dye me, sir, that they're roused themselves at home, and kicked out that scoundrel James and his gang of ruffians?"

"Slife! Hadn't you heard? Where the devil have you been at all?"

Briefly he gave an account. After that, with renewed assurances that aboard ship they should be honourably entertained, Captain Blood led the Governor General and the Admiral to his cabin, what time the work of rescue went on.

"Go home, if you will," said his lordship, when comfortable. Here's a great chance for you, since we declare yourself sick of piracy. Should you choose to serve King William out here during this war, your knowledge of the West Indies should render you a very valuable servant to His Majesty's Government, which you would not find ungrateful. You should consider it. Damme, sir, I repeat: it is a great chance you are given."

Pitt came in to report that the work of rescue was at an end, and the men picked up—some forty-five in all—safe aboard the two buccaneer ships. He asked for orders. Blood rose.

"I am negligent of your lordship's concerns in my consideration of my own. You'll be wishing me to land you at Port Royal."

"At Port Royal?" The little man squirmed wrathfully on his seat. Wrathfully and at length he informed Blood that they had put into Port Royal last evening to find its Deputy-Governor absent. "He had gone on some wildgoose chase to Tortuga after buccaneers, taking the whole of the fleet with him."

"Is Rivarol aware of this?" Blood cried sharply.

It was the Dutch Admiral who answered him. "Would he go dare if he were not? M. de Rivarol he take some of our men prisoners. Berbabs dey tell him. Berbabs he make dem tell. Id is a great ob-

LEE CENTER GIRL WINNER COUNTY ESSAY CONTEST

Faith Dishong's Paper Best of 67 Submitted to Farm Bureau.

There were a total of 67 essays submitted in the Farm Bureau essay contest, 13 of which are to be awarded prizes by the Lee County Farm Bureau. The best essay will be sent on to the Illinois Agricultural Association and a copy to the American Farm Bureau Federation to compete for state and national prizes. The winners in Lee County are as follows:

First—Faith Dishong, Lee Center.
Second—Hugh Barnes, Harmon.
Third—Mary Grace Biesecker, Lee Center.

The ten next best to receive a prize are: Patricia Flemming; John Seitz; Kenneth Ptoutz; Andrew Ventier; Alice Halboth; Adam Gleim; Harry Currans; Hamilton Rissetter; Blanche Clark; Kathryn Mae Rutt.

L. W. Miller, one of the judges, in commenting on the essays said, "The winning essays are indeed a well written lot, and very interesting. I have learned of a number of lines of work that I did not know were carried on by the Farm Bureau."

It was a noticeable fact that the better essays showed a clear understanding of the organization of the Farm Bureau, its work and accomplishments, while some of the other essays that were not in the winning class showed a lack of definite knowledge of the work and accomplishments of the local, state and national organizations.

The winning essay is published herewith:

WHY MY DAD IS A FARM BUREAU MEMBER

My dad is a Farm Bureau member. I believe that it is a good thing for all farmers to be banded together into an organization that is working for the good of farming. The organizations that do this are the County Farm Bureau, the Illinois Agricultural Association, and the American Farm Bureau Federation.

The idea of the farm bureau is to make farming a better business. DeKalb and Kankakee counties were among the first in Illinois to establish farm bureaus. Lee County's Farm Bureau was organized about ten years ago, but it has been working for about nine years. The county farm bureaus make up the Illinois Agricultural Association. By being a member of the Lee County Farm Bureau, my dad is a member of the State and National organizations.

We have not always culled poultry. For the last few years we have been separating our poultry so we do not

Attorney-General Wrestles With Tax Publicity Tangle

The attorney-general, Harlan Fiske Stone, is seen laboring in Washington in an endeavor to straighten out the tangle caused by the sudden publicity given to the heretofore secret income tax returns. He will file suit in a test case in Cincinnati to determine if newspapers have the right to publish the returns.

have to keep those hens that do not lay. By that we raise our egg production.

In cooperation with certain breeders of Holstein cattle the Lee County Farm Bureau has given to farmers many advantages for milk production records. This is not for the purpose of testing for tuberculosis but for the purpose of determining the cost of milk and economics in milk production.

The Lee County Shippers' Association was formed almost four years ago. There are thirteen stations shipping stock cooperatively. My father has shipped with this association and believes in it.

The Farm Bureau helps the farmers to care for their swine properly and to vaccinate them while they are young to prevent disease. My dad's hogs were vaccinated and they did not have cholera.

The Lee County Farm paper is sent to every member. In this farm paper is the exchange column. The paper gives advice on farm problems.

It contains information of use to the whole family.

The Farm Bureau shows moving

pictures which explain canning demonstrations, poultry management and cleanliness.

The Farm Adviser visits farms and tests the soil to see what it needs. Limestone and the growth of alfalfa are used to improve soil. My dad has been growing alfalfa.

Many demonstrations on soil testing, poultry culling, use of sweet clover and alfalfa, and seed corn selection are given to help farmers.

Club work is under the eye of the Farm Bureau. There are the pig, calf, garment and canning projects. The clubs are for boys and girls who are interested in useful work.

Under the item "Weed Control" many things have been done. The Farm Bureau has helped in the control of Canada Thistles. A farmer has the opportunity of selling seed, but I think that it should be first examined and the seed taken out.

Knowing what the Farm Bureau advises, my dad has tried to rid his farm of all Canada Thistles.

My dad says he does not always know when the price of wool is at its highest point, so he sends his wool to the wool pool. There it is kept until

the price is highest. It is then sold and the returns come back to dad or the person who had sent the wool. Dad has pooled wool and believes in the plan.

During out shocking and corn picking time farmers need help. If they cannot persuade anyone to work for them, the Farm Bureau aids by securing laborers from a distance. My dad hasn't needed this help, but I know of farmers who have received help.

Our Farm Bureau has compared our road improvement system with that of other states. The Farm Bureau has decided to improve the roads all they can. A new system has been adopted and is being improved upon all the time. My dad says this will benefit him if carried through.

The Farm Bureau works with the Illinois Agricultural Association and the American Farm Bureau Federation. We are now just starting to secure better law making for farmers and farm business because of their efforts. It has improved during the last two years. This benefits my dad, and everyone else.

The Illinois Agricultural Association has hindered the rapid increase of railroad rates on shipping stock, and has saved the farmers about three-fourths or a million dollars every year.

The Illinois Agricultural Association has made firm the prices of limestone and phosphate. It has been able to put down the prices and the farmers enjoy that very much.

The program of the Illinois Agricultural Association is one for the development of the community.

The Illinois Agricultural Association has helped to raise and lower rates or prices as needed to help the farmer in the farming business.

The American Farm Bureau Fed-

eration worked the passage of a transportation bill, the result of which was reduction on railroad rates.

The American Farm Bureau Federation helped make farming dignified instead of the lowest occupation on earth.

I believe the Farm Bureau has the right motive. I am sure everyone should remember that, "In Union—There is Strength."

BUILD RAILS UP FUJI
Tokyo—Application for permission to build a cable railway up Mount Fuji has been filed with the department of home affairs and railways by a group of Tokyo capitalists. The government has ordered a survey of the mountain's slopes preliminary to issuing the necessary permits.

Permanent roads are a good investment—not an expense

Why America Must Have More Paved Highways

Almost every section of the United States is confronted by a traffic problem.

Month by month this problem is becoming more and more serious.

Hundreds of cars pass a given point every hour on many of our state and county roads. Down-town city streets are jammed with traffic.

Think, too, how narrow many of our roads are, and how comparatively few paved highways there are in proportion to the steadily increasing number of cars.

If the motor vehicle is to continue giving the economic service of which it is capable, we must have more concrete highways and widen those near large centers of population.

Every citizen should discuss highway needs of his community with his local authorities.

Your highway officials will do their part if given your support.

Why postpone meeting this pressing need?

An early start means early relief.

CLOSING OUT SALE

Having decided to quit farming, I will hold a closing out sale on my place of residence, 2½ miles southwest of Walton, 9 miles southwest of Amboy, 7 miles north of Ohio and 6½ miles southeast of Harmon, on what is known as the old Hugh McGuirk farm.

MONDAY, DECEMBER 1, 1924

9—HEAD OF HORSES—9

One bay mare 5 years old, weight 1400, sound; one black gelding 7 years old, weight 1500, sound; One black gelding 10 years old, weight 1400, sound; broke to all harness; one black gelding 20 years old, weight 1200, broke to a harness; one black gelding 10 years old, weight 1100; one black gelding 9 years old, weight 1400; one gray colt 3 years old, sound; one bay mare 7 years old, weight 900, broke to all harness.

15—HEAD OF CATTLE—15

Seven milk cows, some fresh, others springers; two heifers, fresh by date of sale; two 2-year-old heifers; one yearling heifer and two spring calves.

40—HEAD OF HOGS—40

16 feeding hogs weighing around 140 lbs.; 10 pure bred Poland China hogs, cholera immune, of March and April farrow; two sows with 17 suckling pigs.

FARM MACHINERY

John Deere grain binder, 8-ft., new; Weber wagon, new; hay rack; true wagon; wagon box; spring wagon; top buggy; Great Western manure spreader; end gate seeder; Black Hawk planter; new; two-row corn plow; John Deere straight rider; Moline straight rider; walking corn plow; two Town plows; new Acme pulverizer, 8-ft.; 4-section drag; 3-section drag

**ROBE DEMISE
OF MT. MORRIS
WOMAN, AGE 65****Jury Exonerates Son
of Mrs. Williams
After Inquest.****Mt. Morris—**A coroner's jury impaneled here to investigate the death of Mrs. Elizabeth Williams, 65, local woman who died last week at Roselle hospital, returned a verdict of accidental death, exonerating members of the family as having been responsible for the accident.

The woman tripped and fell over trunk while walking through the house at night. Stories of frequent family quarrels caused authorities to make a thorough investigation.

Coroner J. C. Akins, Forreston, called a jury last week Monday and after hearing some testimony, a week's recess was taken.

The victim is said to have made two or three statements while in the hospital. In none of them, according to hospital attendants, did she implicate any member of the family as being responsible.

**Oregon Supervisor
Reported Very Ill****Oregon—**Mrs. Wilbur Brooks moved to Woodstock Wednesday and on her way stopped at Marengo and called on Rev. and Mrs. M. S. Freeman, who left Oregon last fall for Marengo.

Fred Southwick of Monroe Center went Sunday with relatives in Oregon.

Misses Elizabeth Laughlin, Ione Durk and Alice Nicholson motored to Chicago Tuesday for a few days. M. E. Bacon of Davenport and Abby Hackett of Polo, were Oregon business visitors Sunday.

Supervisor Arthur Herbert is critically ill and under the care of a trained nurse at his home on West Jefferson street. Dr. E. S. Murphy of Dixon was called Sunday for consultation with Dr. H. H. Sheets.

Miss Marie Rhoades and Miss June Berry were Rockford visitors Saturday.

Miss Janice Dodge left Sunday for Rock Falls to visit relatives.

Misses Fern Donaldson and Gertrude Ulfers were Rockford shoppers Saturday.

Mrs. E. D. Landers was a Mt. Morris visitor Saturday.

Misses Holland and Stauffer of the school faculty were hostesses to the faculty Bridge Club Wednesday evening.

Mr. and Mrs. Orin Cox motored to Chicago Thursday returning Friday, where they visited his sister, Mrs. John Brooke.

The Fortnightly club of the M. E. church met at the home of Mrs. Edna Jones Monday evening.

William Howard is critically ill at the Woemets hospital in the city. Mr. and Mrs. Harry Maysells and Emily and Miss Flora Blomquist were Dixon visitors Sunday.

Grand Mrs. H. H. Sheets and Mr. and Mrs. W. P. Fearer and Mrs. Lyman motored to Prophetstown Sunday and spent the day with Mr. and Mrs. Warner Greene. Little Barbara Greene accompanied them home after several days visit in the Fearer home. Mr. and Mrs. George Butt have a new boy in their home since Nov. 15. Gerald Myers has been absent from school suffering with a severe cold.

**THREE DAYS'
COUGH IS YOUR
DANGER SIGNAL**

Chronic coughs and persistent colds add to serious lung trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a new medical discovery with twofold action; it soothes and heals the inflamed membranes and kills the germs.

Of all known drugs, creosote is recognized by the medical fraternity as the greatest healing agency for the treatment of chronic coughs and colds and their forms of throat and lung troubles. Creomulsion contains, in addition to creosote, other healing elements which sooth and heal the inflamed membranes and stop the irritation and inflammation, while the creosote goes on the stomach, is absorbed into the blood, attacks the seat of the trouble and destroys the germs that lead to consumption.

Creomulsion is guaranteed satisfactory in the treatment of chronic coughs and colds, bronchial asthma, catarrhal ronchitis and other forms of throat and lung diseases, and is excellent for building up the system after colds or flu. Money refunded if any cough or cold, no matter how long standing, is not relieved after taking according to directions. Ask your druggist. (Creomulsion Co., Atlanta, Ga. (Adv.)

**It Grows Hair
or Your
Money Back**

Thousands of women are growing new hair and getting an end to scalp ailments with the new Van Ness method of treatment. Van Ness Liquid Scalp Lassage makes it easy to give the scalp proper care and to have a head of abundant and glorious hair. The rubber nipples on the patent applicator feed the treatment directly to the hair roots and at the same time gently massage the scalp. Ask us about our money back 10-day treatment plan. We give you a positive guarantee.

GRANGE AS HE ACTS OFF GRIDIRON**Illinois Star Excels in Studies as Well as Athletics**

BY BILLY EVANS

"What kind of a fellows is this 'Red' Grange off the football field?" Thousands and thousands of fans know "Red" Grange as a gridiron star because of his remarkable exploits at the University of Illinois, but few know him as the college student, the plain, human being.

Since the opening of the football season I have been kept busy telling about Grange as I know him in civilian tags.

He's a regular fellow, quiet, unassuming, yet confident of his greatness without the slightest ego.

Among the student body he is a universal favorite. Not simply because he is football's outstanding star, the Babe Ruth of the gridiron as far as packing a scoring punch, for all star athletes are not popular at college.

He is just the sort of chap who, if some admirer approached with I am Mr. Smith, as an opening wedge to

pay homage to his hero, would probably reply:

"Glad to meet you, Mr. Smith; my name is Grange."

At Illinois there are many co-eds. A majority of them are here worshippers when it comes to athletic greatness. It is easy to draw a picture of what a book Grange could have if he so desired.

Red Instructs Kid Brother

While far from a woman-hater, Grange holds no records as the "college fuzzer." He isn't taking a matrimonial course at Illinois. He's there to study and play his part in the athletic life of the university.

Just at present Grange's biggest hobby is imparting his knowledge of football to his kid brother. We would say that young man was very fortunate in having so talented an instructor. Does Grange think very well of the youngster? Listen:

"The kid is a better football player

than I was at his age. I miss my guess if he doesn't do everything a little better than I have ever been able to do it."

A choice bit of praise from a player who is the talk of the football world. And "Red" insists he isn't letting his brotherly feelings influence his opinion.

Rate's High in Studies

Grange is rated a "B" student at the University of Illinois. The system of grading at that institution rates "A" as perfect, "E" as failure. The varying degrees of proficiency ranging from "A" to "E".

What does Grange study in Illinois? If this will enlighten you, he is a student in the Liberal Arts course. This semester he is taking a course in economics covering foreign commerce and commercial policies, continental European history, history of Greece, geology, public speaking and physical education work.

"He's a real student," his pros say. "He's a real football player," says Coach Zuppke.

"He's a regular guy if there ever was one," shouts the student body. What more could one ask?

Intimate Glimpses Life

in Illinois Back in 1767

Springfield, Nov. 17.—Intimate glimpses of life in Illinois in the years of 1767, '68 and '69 are provided in the latest volume of the British Series of Illinois Historical collections, which has just been published by the Illinois State Historical society.

The title to this volume, "the introduction says," is determined by the character of the documents that chance has thrown together, for from almost every page either trade or politics shout at the reader, and on many pages will be heard the union of the two voices.

The story that these documents tell is typical of the course of Illinois history and for that matter, of the course of western American history in general. Men have sought this region while still in the wilderness stage, and later when it was becoming the center of a new population, for the purpose of bettering their economic conditions; and closely connected with this desire for the betterment of economic conditions has been politics, whether played in Westminster or in Washington.

"Throughout the volume the name of one man stands out most prominently. It is that of George Morgan. During the years covered by these pages we obtain the closest view of the activities of this early builder of the west."

Regarding Indians the volume is enlightening. "This is the period," the introduction says, "in which tradition relates at length a story of a severe punishment of the Illinois by other tribes of Indians for the death of

Pontiac, which occurred at Cahokia. All the documents bearing upon the death of Pontiac that could be found are here printed, and it will be seen that there is no evidence of any such catastrophe."

The volume contains 760 pages, and was edited by Professors Clarence Walworth Alvord and Clarence Edwin Carter.

RAILROADS HAVE ESTABLISHED MANY RECORDS THIS YEAR

Big Freight Movement Reported By Lines of the Country.

By Associated Press Leased Wire
New York, Nov. 19.—American railroads saved \$322,591,000 in operating expenses in 1923 and passed along \$657,000,000 of this sum to the public in the shape of reduced freight rates. This statement was issued by the American Railway Association today after the annual meeting here of its 103 class one member roads.

During the first eight months in 1923, according to the statement, the shipping public was saved another \$380,000,000 through reduced freight charges.

The total reduction in freight charges since 1921 was given as \$1,373,000,000. The sum saved to the public in 1922 was about half that saved in 1923—\$336,000,000.

The marked shaving of freight tariffs, the statement observed, was attributable to increased efficiency and economy in operation.

"It has been generally recognized," it was said, "that the railroads of the United States have improved efficiency of service since the return of the railroads to private ownership in March, 1920. At the present time, they are furnishing the most satisfactory service ever given in their history."

The improvement program adopted by the carriers on April 5, 1923, produced the following capital expenditures for 1923 and 1924:

For locomotives, capital expenditures 1923, \$208,966,280; authorized expenditures 1924, \$101,233,000; total \$310,199,280.

For cars, capital expenditures 1923, \$472,757,711; authorized expenditures 1924—\$412,264,000; total \$885,021,711.

For other improvements, capital expenditures 1923, \$1,059,194,426; authorized expenditures 1924, \$1,077,297,000; total \$2,136,446,426.

Of the 1924 budget of \$1,077,297,000 reports from the railroads showed that \$810,904,000 were actually expended during the first nine months.

Expenditures for 1924, it was remarked, topped those for 1923 because of increased authorizations for improvements to roadway, structures and extension of line.

New York, Nov. 18.—Railroads of the nation thus far in 1924 have established seven records in the transportation of freight without car shortage or congestion, the car service division of the American Railway Association reported to that organization today, in semi-annual session here.

Four records were set in October. In one day of that month 1,030,211 freight cars, loaded and empty were moved, constituting, according to the report, "the greatest movement for any day in history."

In one week of October, 1,112,345 cars were loaded with revenue freight. This exceeded by 14,552 the previous record made in 1923.

The greatest number of cars of grain products ever loaded in a single week was 72,474—another October, 1924 record. In this same month records were smashed in the loading of 422,830 cars of miscellaneous freight in a week, and of 259,617 cars of merchandise and less than carload lots.

Covering the year from January 1 to October 25 there was "the greatest movement of commodities on record. The report disclosed, exclusive of coal, coke and ore, which would add 26 percent to the grand total, 31,700,789 cars

SINGING PARIS COP, CARUSO-LIKE TENOR, PERFECT DON JOSE

The Geography of Modesty Told

Washington, D. C.—"A Chinese woman would not think of exposing to the public gaze her bound feet, a lady of Yap would never be seen promenading down the mud-hut boulevard of her native village without her woven necklace of hibiscus leaves though her grass skirt was her only garment, and the Mohammedan woman of a few years ago would not be seen without her veil.

"Modesty has a geography all its own," says a bulletin from the Washington, D. C., headquarters of the National Geographic Society, in connection with the winter fashion decries from Paris.

Keep Finger Tips Hidden

Alexander von Humboldt, who traveled extensively over the world known in the eighteenth century, recorded in his travels that some of the central Asian peoples are reluctant to let anyone see their finger tips.

A traveler who visited the Alaska coast, in the same century, found that native women, after he had persuaded them to remove an ornament which made the lower part of the mouth protrude two or three inches, were greatly embarrassed.

"It seems paradoxical that clothes originated out of the desire for ornamentation rather than for warmth. Arabs of the hot deserts of Arabia and Africa are fully swathed in flowing garments, which only in part serve as protection from the heat, while the Patagonians, from the coldest portion of the South American continent, wear only the skin of one animal as a kind of wind-shield. Our word, modesty, came from the Latin modus, meaning measure of standard, and the clothing which was customarily worn therefore became our first conception of what was the proper or modest thing to wear. Each of the world's peoples consequently has its own standards."

Petticoat Embarrassed Her

"The explorers who first came to American shores found that the Carib Indian woman, who simply wore embroidered girdles, often appeared with out this single garment, but they were never so remiss as to forget to paint their idea of womanly modesty. One of their bodies with annatto, a red or yellowish-red dye. This constituted their idea of womanly modesty. One explorer reported in his journals that a woman of a tribe in Brazil, whose custom it was to go unclothed, had in some mysterious manner acquired a petticoat which she put on for special occasions, but it seemed to have the effect of making her thoroughly ill at ease."

"The Chinese women are among the most demure and modest in the world, but they wear trousers! And, furthermore, some of them would be horrified at the immodesty of a skirt."

"The beaches of American seaside resorts would pain the fine sensibilities of the Sumatra and Celebes savages who considered it highly improper to expose the knees."

The Snaggle-Tooth Mode.

"In one of the New Hebrides Islands in the Pacific a married woman can be modest only by being snaggle-toothed. Part of the wedding ceremony consists of relieving the lady of her two middle incisors by smashing them with a rock."

"Some of the Mohammedan women

We'd like t' bet that if th' foot brakes wuz two or three feet away from th' accelerator ther wouldn't be so many brakes that don't work. This country'll never be what it ought to be till we kin buy gasoline on th' same terms as we do cornmeal an' other necessities.

dreadfully immodest to uncover her hair. Sturdy German peasant women paddle around their homes and fields in dresses that just escape their knees, but they would be shocked at the idea of wearing a dress which was open at the neck.

"In the Tonga Islands a man would consider himself thoroughly unprepared to appear before his fellow mortals unless he was tattooed, and the Marquesans follow much the same practice, the amount of the decoration varying with the rank of the individual, but the legs are always tattooed from ankle to thigh. Warriors have themselves done in geometrical designs with squares and inverted triangles on their faces, and the women are ornamented in patterns which resemble fine lace-work. Some of them wear loin cloths and girdles of tapa cloth, a fabric made from the bark of the breadfruit tree.

"An American lady of 1924 is not selfconscious at exposing her arms and shoulders in the evening, but she would be shocked at wearing a decollete gown to breakfast or lunch. Our demure grandmothers, who represent to us the personification of modesty, wore their sleeveless and neckline dresses all day."

OPERATION I.N. U. STEAM PLANT TOLD BY ENGINEER

O. W. Dodd Tells Inside Story of Workings of Central Station.

O. W. Dodd, chief engineer of the Illinois Northern Utilities company steam plant in this city, has compiled a very interesting table showing the operation of the plant, little of which is known by the general public. The article in which he has set forth his data is as follows:

June, 1918, the Dixon steam station was put on the load for the first time. At that time the equipment consisted of one 3000 kilowatt turbo-generator and two 500 horse power stirring boilers with Murphy stokers. That fall a 750 kilowatt turbine was moved from the Fourteenth avenue station in Sterling and installed and the next year, two more 500 horse power boilers with Murphy stokers were added. In the fall of 1920 the 750 kilowatt turbine was removed and a second 3000 kilowatt turbo-generator was installed and put on the line in March 1921. In 1923, the fifth boiler was installed and this boiler was equipped with even more adequate coal and ash handling appliances.

This last is a 750 Stirling boiler and is equipped with a forced draft chain grate stoker. Features of the equipment are a forced draft fan driven by a 50 horse power motor and an induction draft fan driven by a 75 horse power motor and all of the necessary instruments and equipment that go along with the first class boiler installations are provided. There are larger boilers and some of the higher pressure but none are more efficient or better equipped than this 750 horse power boiler.

The present equipment in the plant consists of two 3000 kilowatt turbo-generators, together with five boilers mentioned. Each turbine has a 7500 square foot surface condenser, one condensate pump, one air pump, and one 8000 gallon circulating pump. Each condenser contains 2500 seven-eighths inch brass tubes and requires the flow of 8000 gallons of water per minute for condensing the steam in the turbine. It is this condensing of steam which makes the turbine the efficient machine which it is. The circulating water passes through the tubes and back into the river from which it was taken. The condensed steam or water is pumped back into the heater and from it to the boilers. Using the same water over and over again is desirable on account of the freeness from sediment and scale forming properties.

The four 500 horse power boilers are heated by Murphy stokers (these by the way, excepting one other installation, are the largest of their kind). The stokers are motor driven. The boilers are operated at about 175 per cent of their rating at about 900 horse power. The other 750 horse power boiler with the forced draft chain grate stoker is operated at from 225 to 250 per cent of its rating, or at 1600 to 2000 horse power. The pressure carried is 200 pounds, at which the temperature of the steam is 3880 degrees. All boilers have super heaters which increase the temperature 550 degrees. The 750 horse power boiler is additionally equipped with an economizer. This utilizes waste gases which are going up the stack to heat the feed water going into the boilers, raising the temperature of the water about 100 degrees. The economizer reduces the temperature of the gases going out of the stack about 200 degrees and effects a saving of from 8 to 10 per cent in the amount of fuel used. Equipment for the feed water (water supplied to boilers) consists of a heater and a three boiler feed pump, two of 150 and one of 200 gallons per minute capacity.

The coal used for the fires underneath the boilers is crushed to screen size and conveyed to the bunker overhead with bucket elevators having a capacity of 100 tons per hour.

The total water pumped by the circulating water pumps, the service

The Chain Store

—where the customer saves

BUYING for cash and selling for cash is an economic plan of merchandising that defies competition. That the customer benefits in the transaction is but stating an obvious fact.

The wonderful development of the Chain Store during the past ten years is the natural result of a fundamentally sound principle in business. It has caught the public favor and is fast spreading throughout the country. Pioneer concerns in this business have become powers in the world of retail merchandising.

We are offering the 7 percent Preferred Stock of the United States Stores Corporation, one of the leading grocery and market concerns now operating over 1,000 stores. The security has a conversion privilege which we believe will prove profitable.

Details regarding the issue and an interesting booklet on Chain Store operations mailed upon request.

The Stanwood Company
111 West Monroe St. Telephone Randolph 6530
CHICAGO

pump, and the boiler feed pumps, amounts to practically 17000 gallons per minute, or 1,020,000 gallons per hour.

The greatest output of the station for one hour was 6500 kilowatts; for one day 85,000 kilowatt-hours; for one month 1,757,000 kilowatt-hours. The greatest amount of coal used for one day was 112 tons, and for one month 2431 tons. The average amount of coal being used at this time amounts to 2000 tons per month.

Taking the greatest output of 1,865,000 kilowatt-hours with a coal usage of 2431 tons a month and comparing this with the smallest output of 189,400 kilowatt-hours with a use of 591 tons for the month plainly shows the increase in the efficiency of the plant operation, increase of 1042 per cent in kilowatt-hours generated with only an increase of 411 per cent in total consumption. The average kilowatt-hour generation per month and the pounds of coal used per kilowatt-hour generated, herewith is given for the last six years and from the first of the year 1924 to the present time:

K. W. H.	Lbs. of Coal Per Month	Per K. W. H.
1918	574,000	4.9
1919	446,000	4.9
1920	600,000	3.5
1921	672,000	3.3
1922	1,028,000	3.0
1923	1,384,000	2.9
1924	1,435,000	2.7

This efficiency is due mainly to three things: Increased load, greater efficiency of the employees and more efficient equipment.

The pounds of coal used per kilowatt-hour generated a few years ago, when the company was operating several small plants, amounted to 20 pounds. Comparing this with 2.7 pounds of coal now used at the Dixon steam plant per kilowatt-hour generated during the past eight months, shows a remarkable saving. To show what this actually amounts to, the month of August, 1924, would be considered. During that month 1,871,000 kilowatt-hours were generated. Since the saving in coal during that month when 2.7 pounds were used per kilowatt-hour amounts to 17.3 pounds per kilowatt-hour, as compared with a few years ago when it required 20 pounds per each kilowatt-hour, multiplying this saving of 17.3 pounds per kilowatt-hour generated during August, namely: 1,871,000 kilowatt-hours, will give the saving for that month alone due to more efficient operation and this amounts to 32,388,300 pounds of coal or 16,184.15 tons saving for that one month.

Big Attraction Tonight at Dixon Elks' Lodge

One of the big features on the Elks winter entertainment course here this season will be the National Male Quartet which will appear here this Saturday night.

This splendid singing and entertainment organization during the past summer made a tour of one of the Chicago circuits, and was one of the best received numbers on the entire program of this circuit.

Everywhere the National Male Quartet was received with remarkable enthusiasm, not only because of the splendid artistry of its members, but also because of the notable entertainment features presented.

Charles Cox, basso, leader of the quartet is a capital character comedian and presents a number ofimitable sketches.

Wallow complexions—often the result of improper digestion—

ILLINI STALWARTS PLAY THEIR LAST AGAINST OHIO

ROY MILLER, Guard

DICK HALL, Tackle

LOUIS SLIMMER, Guard

Here are three sturdy Illini who play the last games of their college careers against Ohio, in the Illinois memorial stadium next Saturday, Nov. 22. Roy Miller, an Urbana product, "the man in the black mask" has played three years at guard on the fighting Illini and is considered one of the best guards of recent years. Dick Hall of Logansport, Ind., is playing his second year on Illinois.

Previously he had played a year on Butler. Big Dick has improved a lot this season and the Illini have had little to complain about his tackle. Louie Slimmer, from Millville, N. J., was a reserve last year and stepped

into Jim McMillen's place at guard. Slimmer is a hard fighter and does a pretty good job all in all. These lads will bear a lot of the brunt of the Ohio attack next Saturday.

of honor at a home coming dinner Nov. 28 tendered him by the citizens of Wheaton, Illinois, where he first rose to gridiron fame as captain of the high school team and where he keeps in condition as an ice man in the off-football season.

All Officials of Game Deny Seeing Roughness

By Associated Press Leased Wire

St. Paul, Minn., Nov. 19—Statemen said there was no roughness on the part of Minnesota players in their football game at Minneapolis last Saturday with Illinois in which "Red" Grange was injured, were made today by two of the men who officiated in the contest.

It is exactly what the Illini are doing as they prepare for the Ohio invasion Saturday when the season will close with the annual midwest grid classic, the Illinois-Ohio, Zuppke-Wilce duel.

The Illini are ready to top off work

for the Buckeyes after scrimmages all midweek. "Zup" is taking care that his men will not go stale after their hard season, and has finished the hard evening.

"Zup" is working hard to strengthen

the defense for Ohio's notoriously potent passing attack. He is concentrating on the line, and must also revamp his attack. With the mighty "Red" Grange probably out of it and Swede Hall and Wallie McIlwain still injured, it may be a substitute backfield which starts against the Buckeyes. Hall and McIlwain may start, but Purdum and Gallivan will relieve them if needed.

Twelve Heavyweights Meet in Bouts in N. Y. Tonight

By Associated Press Leased Wire

New York, Nov. 19—Twelve heavyweights will meet at Madison Square Garden tonight. Ed. Garvey, former Notre Dame football star, will make his professional pugilistic debut against Tom Lazuka of the Bronx. The feature bout brings together Miguel Ferrera, training buffer for Luis Firpo and Joe Silvani, a New York youngster.

SPECIFIC PROGRAM TIMBER-SAVING IS PLEA OF PRESIDENT

Addressed Conference of
Wood Manufacturers
at Washington.

By Associated Press Leased Wire

Washington, Nov. 19.—President Coolidge today asked for a specific program of timber-saving in opening the national conference of utilization of forest products.

The nation faces timber exhaustion, the President warned, and the situation must be met by diminishing waste and increasing the supply.

The resources of the nation are a trust, Mr. Coolidge declared, subject to use by the present generation, administered free of monopolies and from those "who will unwisely permit them to be dissipated," but there must be restoration as well as use.

About 745 billion cubic feet of timber is left in this country, he pointed out, and against this supply there is an annual drain of 25 billion cubic feet while the annual timber growth is only six billion feet. In the face of this situation, he declared, the nation must turn to the problem of growing wood from the soil like any other crop.

Must Reduce Consumption

"To bridge this fatal gap between cut and growth," however, Mr. Coolidge said, sufficient action had not yet been taken and the country must consequently adjust itself immediately to a reduced per capita consumption.

The President says "hopeful signs" in federal legislation as enacted in the Clarke-McNary bill in the last session of Congress, making provision for fire protection and restoration, and in the Weeks law authorizing government purchase of numerous forest tracts. These must be supported, he declared, by a policy which will "in the hands of private individuals or public officers tend to the further advancement of this already well-defined and securely adopted principle."

"So vast an enterprise as the forest-using industries must not be allowed to decline for lack of raw material," the President continued. "We have abundant soil to produce it. We have the energy and the intelligence to learn to use our forests without waste. This conference ought to lay the foundation of a far-reaching and effective effort for forest thrift.

"In the coming struggle for timber, economic survival among the forest industries will depend on economic fitness. Economic fitness will be measured by good management and good technical processes. These qualities come from research and from training; and the forest industries to reach a high level of skill, must make a full use of both these tools of modern industrial progress. Hitherto, the diversity, the geographical isolation, and the small average size of our wood-using industries, coupled with the abundance of raw material, has kept them from advancing as rapidly in improved methods as some of our more highly concentrated industries. But timber shortage will force competition in better methods. Much is already known of better methods and the time is already here when this knowledge can be profitably employed. Many companies have in fact made notable progress in waste reduction and are furnishing examples of what can be done by careful management and expert planning. It seems by banding together can overcome their handicaps of isolation and collectively employ more experts to work out better processes.

Resources are a Trust

"It is to consider joint efforts toward better forest utilization that this conference has been summoned. It is a movement in which the state and national governments, the industries, the universities, and the technical experts should join. The various government agencies equipped to help will, I know, be eager to do what they can to forward this undertaking.

"We hold the resources of our country as a trust. They ought to be used for the benefit of the present generation, but they ought neither to be wasted nor destroyed. The generations to come also have a vested interest in them. They ought to be administered for the benefit of the public. No monopoly should be permitted which would result in profiteering, nor on the other hand should they be indiscriminately bestowed upon those who will unwillingly permit them to be dissipated." These great natural resources must be administered for the general welfare of all the people both present and future. There must be both use and restoration. The chief purpose of this conference is to discover policies which will, in the hands

CARDINAL LOGUE, IRISH PRIMATE, DIED THIS MORN

Venerable Archbishop is
Taken Suddenly; Illness
Not Intimated.

Belfast, Ireland, Nov. 19.—(By The Associated Press)—Cardinal Logue, prime of Ireland is dead.

Death occurred at 6 o'clock this morning.

There had been no previous intimation of the Cardinal's illness and the news of his demise caused a great shock throughout Ireland.

He Strove For Peace

Cardinal Michael Logue, venerable Archbishop of Armagh and Primate of All Ireland, "the successor of St. Patrick," strove for Irish tranquillity and peace. The guerrilla tactics of Sinn Fein sympathizers and the reprisals of the Black and Tan filled him with horror and evoked strong pastoral letters denouncing the crimes which, in 1920, brought Ireland to the verge of civil war.

Exhorting the people to prayer and to avoid all associations leading to crime and disaster, the Cardinal in November of that year charged that "the activities of the British military authorities are carried into districts which hitherto have been considered peaceful." He concluded: "God help our country, moaning under this competition in murder." The calamities in Ireland, he declared, were greater than in the memory of any living man.

Cardinal Logue

State center, will round out his varsity football career in the annual game with Illinois, to be played Nov. 22 in the new Illinois Memorial stadium. Young started out as a tackle in 1921, did not play in 1922, and held down the center job last fall and again this season. Young served with the Red Cross during the World War.

Visited U. S. in 1908

The Cardinal paid a visit to the United States in 1908, at the time of Roman Catholic archdiocese of New York. He celebrated pontifical mass in St. Patrick's Cathedral in a \$6,000 vestment and later was the guest of President Roosevelt whom he greatly admired. Before returning home he placed a wreath on the tomb of Washington at Mt. Vernon. He also met Andrew Carnegie and John D. Rockefeller and in a public statement praised them for their philanthropies.

At the outbreak of the world war, Cardinal Logue said Irishmen would "stand by England" but later blamed the government for the political unrest in Ireland. He opposed conscription on the ground that it would create grave disorder. When the war was over and the Versailles treaty had been concluded he declared "the whole peace business is a game of grab".

Mr. Stead has pledged the aid of the Australasian government to the project.

The greatest feat, he added, will be the 2100-mile hop from San Francisco to Honolulu. With this accomplished the flight to Manila could be made in easy stages, with stops at Johnston Island, Jaluit Island, Panape and the Pelew group. The third leg would be from Manila to Sandakan, and then follow the route taken by Sir Ross Smith in his memorable flight from Europe to Australia along the Australian coast, within the barrier reef where calm water always would be encountered.

The fourth leg would be from Sydney to Honolulu, by way of Fiji, Samoa, Phoenix and Palmyra Islands.

Was Born in 1840

Born at Kilmacrenan, Ireland, on October 1, 1840, he studied at Maynooth and Durhoyne and upon graduation showed such scholarship that he was appointed, although not yet a priest, to the professorship of theology and belles lettres in the Irish College, Paris. Ordained in 1866, he returned to his native diocese of Raphoe in 1874 and was made a doctor of divinity. Two years later he became a dean of Maynooth and professor of Gaelic, which position he exchanged in 1878 for the chair of dogmatic and moral theology.

On July 20, 1879, at the age of 39, he was consecrated Bishop of Raphoe and for eight years labored among the people of Donegal, who at that time

were impoverished by a failure of the crops. In one year he collected for the relief of the people of his diocese nearly \$150,000 and in 1887 the parish priests of Armagh chose him as coadjutor to their venerable Primate, a position to which he soon after succeeded. Pope Leo XIII, in 1893, elevated him to the Cardinals.

It was an event that filled Armagh with pride for it was a dignity never before attained by even the greatest of 114 Primates going back to the days of St. Patrick. The Cathedral of Armagh, under his administration was enlarged in 1897 by the addition of the Synod Hall, northeast of the main edifice. Seven years later the Cardinal broke all precedents by having the historic interior of the Cathedral redecorated. The work, begun in 1900, was finished in 1904, and resulted in attracting many pilgrims to Armagh.

Dissolved Republic Govt.

Cardinal Logue expressed satisfaction upon the conclusion of the Anglo-Irish treaty in 1921, declaring he thought the settlement terms just. He said at that time and repeated the sentiment on other occasions:

"I should like to see unity and no division of the country, so that all could pull together for the good of Ireland. I should like the people of Ireland living in peace and charity with each other."

Archbishop O'Donnell, the cardinal's coadjutor who lives at Dundalk, was advised, left for Armagh.

Cardinal Logue was a great admirer of American institutions although he disliked the republican principle with which he discussed frankly with the late Co. Roosevelt on one of his two visits to America. It was this dislike which made him welcome the dominion solution of the Irish question.

Airmen Plan Flight to Belt the Pacific

By Associated Press Leased Wire

Honolulu—The visit of the United States fleet to Hawaiian and Australian waters will be made the occasion for the first round-the-Pacific flight, under plans which are being backed by the Pan-Pacific Union here.

The idea was conceived by David Stead, Australian delegate to the recent Pan-Pacific Food Conservation Conference, who has made a study of aviation, and has been given the unofficial approval of the ranking army and navy officials here.

A flight in four sections is contemplated: San Francisco to Honolulu, Honolulu to Manila, Manila to Australia and Australia to Honolulu. He also mentioned Andrew Carnegie and John D. Rockefeller and in a public statement praised them for their philanthropies.

Commander John Rodgers, U. S. N., commander of the naval air forces here, said that while he considered the hop from San Francisco to Honolulu as a "stunt," he hoped it could be made. He regarded the route from Honolulu to Australia as practicable and estimated that it could be covered with one of the navy's new type planes in six days, as compared with the present steamer time of 14 days.

Mr. Stead has pledged the aid of the Australasian government to the project.

The greatest feat, he added, will be the 2100-mile hop from San Francisco to Honolulu. With this accomplished the flight to Manila could be made in easy stages, with stops at Johnston Island, Jaluit Island, Panape and the Pelew group. The third leg would be from Manila to Sandakan, and then follow the route taken by Sir Ross Smith in his memorable flight from Europe to Australia along the Australian coast, within the barrier reef where calm water always would be encountered.

The fourth leg would be from Sydney to Honolulu, by way of Fiji, Samoa, Phoenix and Palmyra Islands.

Wood Manufacturers in First National Conference

By Associated Press Leased Wire

Washington, Nov. 19—With President Coolidge delivering the opening address; about 350 producers, manufacturers and consumers of wood and wood products assembled here today for the first national conference on utilization of forest products to consider methods for eliminating waste

and conserving timber.

ANSWER TO YESTERDAY'S PUZZLE

GRANDMA'S FARM

Hal Cochran's DAILY POEM

LET'S take a trip in old memory's ship to a farm that is out in the open. Answer the call of the briskly-like fall when for fresh air and pep we are gropin'

In the days that are gone, at the break of the dawn we would hitch up old Dobbin and ride. The shout of hurray sent the old one-horse shay to the cheerful and bright country side.

But now things are changed and they're all rearranged. The auto forced Dobbin out soon. It takes an hour though we're still on horsepower, and it used to take all afternoon.

Where Dobbin was struttin' nowadays we're put gittin' 'tis funny how things come to pass. Once the horse had a rep but it's now out of step as we just have to step on the gas.

And when we arrive all the air is alive with the spirit that makes it a fact, that though autos take us, the countrysides make us just wish that old Dobbin were back.

CROSS WORDS

Hal Cochran's DAILY POEM

COME on now stop stallin' admit that you've fallen for something that's spread o'er the land. Word puzzles we find are on every one's mind and it's likely you've taken a hand.

This modern day craze has put minds in haze and run all other puzzles to rout. Cross-wording is fun that's the reason it's done. So we're all wildly working them out.

We circle a table whenever we're able and every one starts in to think. We dig for a word that we never have heard and when found it makes other words link.

Some word is a stickler while others come quicker. On judgment we needs be discreet. Whenever you stick you will get a real kick if you work out the puzzle complete.

When cross-wording folks don't just think they are jokes don't just figure you're uselessly fretting. Your mind is kept burning new words you are learning a fine education you're getting.

(Copyright 1924 NEA Service Inc.)

BREAKIN' EM IN

Hal Cochran's DAILY POEM

IT'S nice when window shopping, to be lookin' round and stopping just to see the things the stores have on display. But it's nicer to be buying of the things that you are eyenin' and to try things on ere you are on your way.

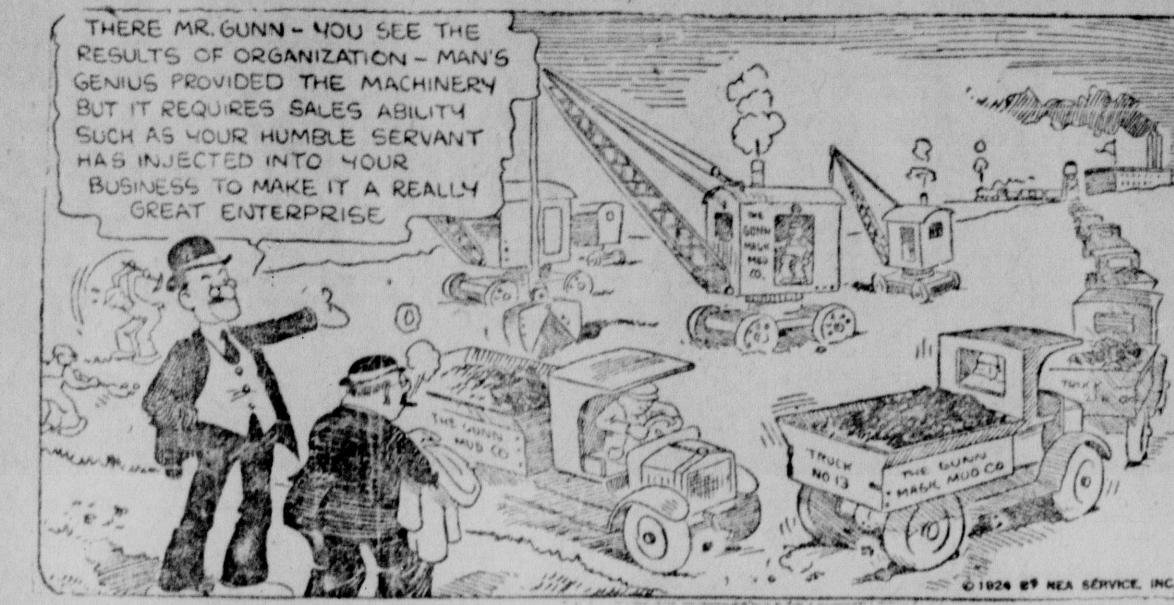

Shoe store windows have attraction and they promise satisfaction if you'll have some kickers fitted to your feet. So you enter and be seated while you're very kindly treated and you're shown a line of brogans that are neat.

After trying many shoes on you are told that you can't lose on any pair that you may finally select. Course you do a lot of fretting, are you right in what you're getting? Then you pick the pair that gives the right effect.

It is easy just to try 'em, and it's not so hard to buy 'em. It's a situation where we all have been. But you have a heap of trouble and the two shoes make it double, as you're achin' while you're breaking new shoes in.

CENSUS OF FARMS TO BE TAKEN THIS WINTER BY GOVT.

**Rockford Man in Charge
of Work in First
Illinois Dist.**

Washington, D. C.—The Department of Commerce is about to take a census of agriculture covering the crop year 1924 and relating to conditions on or near January 1, 1923. This is the first Census of Agriculture to be taken midway between the decennial censuses; the Act of Congress authorizing it is based on the belief that, with rapidly changing conditions in agriculture, there should be a stock-taking as often as every five years. The work of taking the census will begin on December 1, and is to be completed on or before January 31. As rapidly as possible after the receipt of returns, statements will be released for the press, by the Census Bureau at Washington, relative to production of the principal farm crops and the values of farm properties, including land, buildings, machinery, and live stock.

The enumeration will require the services of 15,000 to 20,000 enumerators, acting under the direction of 212

supervisors, who have for the most part been selected from the employees of the Bureau of the Census and the Department of Agriculture. Employees of the Forest Service will secure the Census returns for most of the farms within the National forest reserves in Arizona, California, Colorado, Florida, Idaho, Minnesota, West Virginia, and Wyoming.

Sample questionnaires are being widely distributed to the farmers, to familiarize them with the information soon to be called for by the enumerators. In addition to the usual inquiries relative to production, values, and farm expenses, the schedule calls for the amount of taxes paid by the far operator on farm property, including real estate tax, personal property tax, and special assessments. It is important to ascertain just what the burden of taxation resting upon the farm really is and how it compares with the amount to taxes paid by other interests. This may point the way to a more equitable adjustment of the tax burden.

Heretofore the census of agriculture has always been taken in connection with a complete census of population. This time it will cover the farm population only, showing the number of persons living on the farm, including the family of the operator and the farm laborers and their families. These persons will be classified as under or over ten years of age and as white or colored.

The extent to which farm operators used the purchasing and selling facilities of farmers' organizations will be

brought out by two inquiries: one calling for the value of products of the farm sold through a farmers' marketing organization, and the other calling for the value of all farm supplies purchased from or through a farmers' organization. An additional index to the marketing conditions will be brought out by answers to inquiries as to the kind of road adjoining the farm, whether concrete, brick, gravel, macadam, improved dirt, or unpaved dirt, and the distance to the nearest market town. Through inquiries of this character the Census seeks to secure information relative to conditions upon which to a considerable degree the success of farm operation depends.

E. W. Koch of Rockford has been appointed supervisor of the enumeration in District No. 1, Illinois. He will have 78 enumerators under him, and under the 1920 census there were 15,228 farms in the district which comprise fourteen counties—Boone, Carroll, Cook, DeKalb, DuPage, Jo Daviess, Kane, Lee, McHenry, Ogle, Stephenson, Whiteside and Winnebago.

Another Ohio Store Has Been Sold Out

Ohio—La Verne Kelley, son of Mr. and Mrs. Grant Kelley had the misfortune to fall and break his ankle during a friendly scuffle with a schoolmate on the steps of the public school building.

Devine & Anderson sold their stock of groceries last week to local grocers and their dry goods to the same firm

that purchased the stock of men's furnishing goods from W. H. Knuth. Both stocks will be sold at auction.

About eighty men and boys enjoyed the Father and Son banquet held at the M. P. church Tuesday evening.

Dr. L. E. Long of Princeton tested several herds of dairy cattle in this vicinity last week.

E. T. Schmaus of Kewanee spent last week with his mother, Mrs. F. B. Schmaus.

M. H. Libbey was a business caller in Princeton Thursday afternoon.

A. C. Ruff, assistant cashier of the First State bank attended a bank meeting in Shefford Thursday afternoon.

Mr. and Mrs. V. R. Pomeroy were Princeton visitors Friday afternoon.

Mrs. Emma Cooper and daughter of

Des Moines, Ia., were guests at the V. R. Pomeroy home last week.

Nick Johnson shipped three carloads of hogs to the Chicago market last Thursday.

Wm. McDermott of Princeton was a business caller in town Friday afternoon.

Wayne Denbo of Aurora spent Friday night with relatives here.

Mr. and Mrs. Horace Morse were Princeton callers Saturday afternoon.

Mr. and Mrs. Merrill Jackson and Albert Bryant made a business trip to Aurora and Wayne Saturday.

Mrs. Mary Inks is visiting relatives in Freeport.

Mr. and Mrs. F. W. Lewis of Robinson, Ill., are visiting Mrs. Lewis and daughter, Mrs. Guy Soder and family.

Mrs. Azalia Pomeroy and Mr. and

Mrs. Orville Westgor and baby of Dixon visited relatives here Sunday.

H. A. Jackson transacted business in Princeton Saturday afternoon.

The Misses Luella and Nellie Byrne

have moved into their beautiful new bungalow on South Main street.

Peter Demerath and daughter Mrs.

Lena Liechey moved their household goods last week to Lake Geneva, Wis.

where they will reside. Mr. Demerath

was one of the earliest residents of

this place, and we regret to lose these

estimable people from our midst.

FRIENDSHIP BROKEN

Walshamlow, England—Godfrey Hallows and Harrison Riches were friends for 65 years. They were playmates at the age of 3, and their first breeches were made from the same piece of cloth. Both went to school together and were married at the same time in the same church. But now their friendship has come to an end when Hallows refused to wear a red necktie like Riches'.

The ancient Romans ate the larvae of beetles.

A supply of white paper for the pantry shelves is what every housekeeper should have. Try a 10-cent roll. B. F. Shaw Printing Co.

More than 18,000 tons of sugar were produced in two beet root factories last year.

French have invented a radio receiving set that can be carried in an umbrella.

This Company Carries their Own New
York Symphony Orchestra of 20
Pieces.

The Event of The Year

For the first time in the history of pictures, a great feature is sent out with a special company and the same complete scenic investiture of its original run in New York, where for 7 full months it astounded the critics by its sensational features. THE THIEF OF BAGDAD comes to Dixon with a complete NEW YORK SYMPHONY ORCHESTRA, quaint Oriental Lobby entertainment, Bagdad Coffee Service, Mohammedan Chanter and the beautiful stage setting that lends the Arabian atmosphere to the production.

When the famous Jay Kauffman of the New York Telegram-Mail said: "We have never seen anything to compare with it and never expecto," he was only agreeing with the other critics such as Mordaunt Hall of the New York Times who said "a feat of motion picture art which has never been equalled," and the New York World which said, "so far superior to anything else, comparison is rendered impossible." All over the country critics acclaim it as the first great stride in picture production in 9 years. You must see it.
